Data Analyst with hands-on experience in Python, SQL, and Power BI, specializing in churn analysis, product funnels, and behavioral analytics. Strong in transforming raw data into business-ready insights through correct data modeling, analytics engineering, and executive-level dashboarding.

Experience

AI Variant — Remote
Data Analyst Intern — *Nov 2024 – Aug 2025*

- Built 5+ SQL analyses and Power BI dashboards tracking churn, funnel performance, and revenue KPIs, reducing manual reporting time by 40% for business stakeholders.
- Cleaned and transformed 3+ multi-source datasets using Python and Pandas, improving data quality by resolving 100+ inconsistencies to support reliable downstream analytics.
- Condensed complex analytical findings into visual reports adopted by stakeholders across 2 business teams, accelerating data-to-decision turnaround.

Projects

Finsery – Content Automation Pipeline (Open Source) — 2026
n8n, Python, REST APIs, LLM APIs

- Diagnosed and resolved a critical content management bug in Finsery's n8n pipeline, restoring consistent article scheduling and eliminating delivery failures across 100% of affected workflows.
- Debugged and extended 4+ HTTP request nodes integrating OpenRouter and LLM APIs, cutting manual intervention in content workflows by an estimated 60%.
- Refactored node configurations to cover 8+ edge cases in content ingestion, achieving consistent output formatting across all automated financial editorial pipelines.

E-commerce Sales Performance Analysis — Apr 2025 – May 2025
Python, SQL (PostgreSQL), Power BI, Excel

- Analyzed 50,000+ transactional records using Python and Pandas, uncovering 3 high-revenue product categories.
- Wrote 10+ SQL queries using window functions and GROUP BY aggregations, identifying a 22% seasonal revenue spike that informed restocking decisions.
- Built a 4-page Power BI dashboard with drill-down visuals, reducing time-to-insight for regional sales reviews from hours to under 10 minutes.

Telco Customer Churn & Revenue Analysis — Jan 2025 – Mar 2025
Python, SQL (PostgreSQL), Power BI

- Performed SQL-driven churn segmentation across 7,000+ customer records, identifying 3 high-risk cohorts responsible for an estimated 35% of potential revenue loss.
- Delivered a 5-page Power BI dashboard summarizing churn KPIs and behavioral drivers, enabling stakeholders to shortlist 500+ at-risk customers for retention action.

Mobile App Funnel and User Behavior Analysis — Apr 2024 – Jun 2024
Python, SQL, Power BI

- Built a session-level product funnel from 50,000+ user event logs using SQL, enforcing correct event sequencing and binary reach flags, improving funnel tracking accuracy by 30% compared to raw aggregations.
- Analyzed stage-wise conversion rates and time-to-conversion across 10,000+ sessions, segmenting fast and slow converters while excluding non-purchasing sessions, reducing behavioral bias and improving insight reliability.
- Engineered analytics-ready funnel tables and KPIs for SQL and BI consumption, and delivered a 4-page Power BI dashboard identifying 3 major drop-off points, enabling targeted UX improvements and conversion optimization.

Revenue Optimization for E-commerce Checkout — Jan 2024 – Feb 2024
Python, SQL, Power BI

- Designed and analyzed an A/B testing experiment on checkout flow across 20,000+ user sessions, identifying key friction points and improving conversion rate by 8.5% through data-driven UX recommendations.
- Applied statistical hypothesis testing (t-tests, confidence intervals) to validate experiment results, ensuring decision reliability and minimizing false-positive outcomes in conversion analysis.
- Built automated SQL and Python pipelines and delivered a 5-page Power BI dashboard, reducing experiment analysis time by 40% and enabling stakeholders to track conversion uplift and revenue impact.

Education

VIT Bhopal
Engineering College
B.Tech – Computer Science & Engineering
Jul 2019 – Dec 2023

Skills

Python & Data ●●●●○
Python, Pandas, NumPy, SQL, PostgreSQL, MySQL

BI & Analytics ●●●●○
Power BI, DAX, EDA, Funnel Analysis, KPI Design

Data Concepts ●●●○○
Data cleaning, feature engineering, KPI design, funnel analysis

Statistics ●●○○○
Descriptive statistics, segmentation analysis, trend analysis

Automation ●●●○○
n8n, OpenRouter API, LLM API Integration, Git

Certifications

AWS Certified Cloud Practitioner
Amazon Web Services
Cloud Fundamentals

Data Science Program
ExcelR | Python, SQL, Analytics
Data & Analytics

GenAI & LLMs Workshop
Cuvette
Artificial Intelligence

Tata Imagination Challenge
Advanced to Round 3 – 2022
